2002 IDAHO WHEAT VARIETIES – SUPPLEMENT

Historically, the Idaho Wheat Varieties publication has listed class estimates and estimates for the twenty wheat varieties with the largest planted acreage. Publication was limited to the top twenty varieties for several reasons. First of all, estimates for smaller acreages are usually based on fewer reports and therefore are less statistically reliable. The top twenty varieties usually account for more than 80 percent of Idaho's planted acreage. Another reason for limiting to only twenty varieties has simply been the space available on our publication. However, requests for information about additional varieties increase each year. During the 2002 survey, we collected positive reports for 86 different wheat varieties. This supplement lists estimates for 31 additional varieties which account for 15.2 percent of Idaho's total wheat planted. Durum wheat varieties are not included since durum wheat is not part of Idaho's wheat acreage estimates.

Partial funding for the 2002 Idaho Wheat Variety Survey was provided by the Idaho Wheat Commission.

2002 IDAHO WHEAT VARIETIES – SUPPLEMENT

ACRES OF WHEAT PLANTED TO VARIOUS VARIETIES 1/

VARIETY	CLASS	2002				
		DISTRICT 10	DISTRICT 70	DISTRICT 80	DISTRICT 90	STATE
